

The image shows a software window titled "Import Model" with a blue icon. The window has standard Windows window controls (minimize, maximize, close) in the top right. Below the title bar, the text "Import Model" is displayed in bold. Underneath, a subtitle reads "Import an Archi model into the currently selected model". To the right of this text is a small icon of a document with a grid. The main area of the dialog is divided into two sections. The top section, titled "Import from file", contains a text input field with the file path "C:\Users\UT00YBH9\Desktop\Modèle Archi\Diagnostic.archimate" and a "Choose..." button to its right. The bottom section, titled "Options", contains three checked checkboxes: "Update existing objects and folders", "Update model information and top-level folders", and "Show Status Dialog after importing". At the bottom of the dialog, there is a help icon (question mark in a circle) on the left, and "Import" and "Cancel" buttons on the right.

Import Model

Import Model

Import an Archi model into the currently selected model

Import from file

File: C:\Users\UT00YBH9\Desktop\Modèle Archi\Diagnostic.archimate

Choose...

Options

- Update existing objects and folders
- Update model information and top-level folders
- Show Status Dialog after importing
